

MATHEMATICS

The examination will be based on the Higher Tier syllabus for GCSE/IGCSE, although the questions will not necessarily be presented in a similar manner. Any questions involving topics outside the syllabus will not require any previous knowledge as instructions will be given in the question.

The problems are designed to be challenging and candidates are not necessarily expected to answer every question. Candidates are expected to show their working very clearly and set out their working in a clear, logical manner.

P. A. Mobbs
Head of Mathematics
