

PHYSICS

The aim of the Scholarship paper is to examine a number of key skills expected of a potential Sixth Form Physicist, as well as their genuine academic potential.

The examination will be based on topics from the GCSE/IGCSE. Any questions involving topics outside the syllabus will not require prior knowledge.

The following skills will be examined:

- The ability to handle and analyse numerical data
- Confidence with numbers
- The accurate use of a calculator
- Graphical plotting of data
- The ability to think through a problem in an unfamiliar situation
